

ASG INTERNAL STAFF RESOURCE

Sales Appointment Capture

Staff User Guide

A practical guide to completing, reviewing and handing over in-person and Zoom sales appointments.

APPLICATION VERSION 2.7.0-alpha.1
PUBLISHED 22 JULY 2026

1. Overview

Sales Appointment Capture guides staff through appointment details, required forms, supporting evidence, signatures and final handover documents. The application is designed for desktop, tablet and mobile use.

What the application produces

- A **Combined PDF** containing the selected client forms and attached ID/photo pages.
- A **Document ZIP** containing the individual generated form PDFs and supporting uploaded documents.
- A prepared email addressed to the configured recipient, ready for the generated files to be attached.

Important: The on-screen staff checklist is not included in the client PDF. It supports the appointment process only.

Core status cues

Status	Meaning
Unsaved changes	Information has changed since the last draft save.
Draft saved	The current draft was saved on this device.
PDF ready	The latest appointment output was generated.
Output invalidated	A field changed after generation; regenerate before handover.

2. Quick Start

1. Open **Sales Appointment Capture**.
2. Select your name.
3. Choose **In-person** or **Zoom**.
4. Select **Continue**.
5. Complete each relevant stage from left to right.
6. Save a draft during the appointment.
7. Resolve every item shown in **Appointment Summary**.
8. Select either a Contract Due Date or **To Be Confirmed**.
9. Choose **Generate Appointment Package**.
10. Download the Combined PDF and Document ZIP, then prepare the email.

Before you begin: Confirm the correct staff member and appointment type. These choices control the visible workflow and generated filenames.

The screenshot displays the ASG Sales Appointment Capture app interface. On the left, a dark blue sidebar contains the ASG logo (Amplify Solutions Group) and the title 'Sales Appointment Capture'. Below the title, it states 'PROFESSIONAL. COMPLIANT. COMPLETE.' and describes the app's purpose: 'Capture every detail, generate compliant documents, and deliver premium client experiences.' Three circular icons represent key features: 'Compliant' (Built for Australian standards), 'Complete' (All documents in one place), and 'Secure' (Your data remains on this device). The version '2.7.0-alpha.1' is noted at the bottom of the sidebar.

The main content area is light yellow and titled 'WELCOME Start New Appointment'. It prompts the user to 'Select your name and appointment type to begin.' Below this, there is a 'Your Name *' dropdown menu with the placeholder 'Choose your name'. Underneath, the 'Appointment Type' section offers two options: 'In-person' (highlighted with a person icon and labeled 'Face-to-face appointment') and 'Zoom' (with a Zoom logo icon). A large orange 'Continue →' button is positioned below these options. A small security notice at the bottom right of the main area states: 'Secure & Professional Your information is protected on this device'.

Appointment type selection

3. Choosing the Appointment Type

In-person

Use for face-to-face appointments that may require an Expression of Interest (EOI), Irrevocable Authority (IA), ID photographs and client signatures.

The in-person timeline contains seven stages:

1. Client Details
2. EOI
3. IA
4. ID Docs
5. Signatures
6. Checklist
7. Ready

Zoom

Use for online consultations. The Zoom timeline contains eight stages:

1. Client Details
2. Discovery
3. Financial
4. Professional
5. Strategy
6. Workspace
7. Outputs
8. Ready

Tip: Use **Change Type** only when the appointment mode was selected incorrectly. Confirm the current information has been saved first.

4. Staff Login and Appointment Setup

Select your own staff record on the landing page. This selection is used in the appointment workspace, generated filenames and prepared-email sign-off.

Initial appointment details

Field	What to enter
Date	Appointment date in Australian format.
Team Member	Confirm the selected staff member.
Client Current Address	Client's present residential address.
Address of Property Sale	Property connected with the appointment.
Client 1	Name, contact number and email.
Client 2	Complete only when a second client participates.

Use **Client 2 added** or **Not required** as the visible participation cue. Client 2 remains optional unless the appointment genuinely includes a second client.

Privacy: Use the application only for the active appointment. Do not use real client information in demonstrations or training captures.

5. In-Person Workflow

Move through the seven-stage timeline from left to right. A green stage indicates complete, gold indicates the current stage, and an outlined stage still needs attention.

In-person workspace controls and timeline

Recommended order

- 1. Confirm client and property details.
- 2. Enable and complete EOI when required.
- 3. Enable and complete IA when required.
- 4. Attach clear ID images for participating clients.
- 5. Capture signatures in the correct signature fields.
- 6. Review the staff checklist and Appointment Summary.
- 7. Generate the final package only when the Ready stage is satisfied.

Important: Enabling EOI or IA adds the corresponding form to the generated output. Leave a form disabled when it is not part of the appointment.

6. Sale Details

Complete Sale Details when EOI is enabled. Fields adapt to the selected sale type and Client 2 participation.

Include this when an Expression of Interest needs to be added to the final PDF. Client 1 details are filled from the appointment details. Use this section as the source for sale/property details.

2. Expression of Interest form

M

Sale details on mobile

Area	Guidance
EOI Template	Use the configured template unless instructed otherwise.
Ownership	Choose Sole Owner, Joint Tenants 50/50 or Tenants in Common.
Percentage shares	Enter shares when Tenants in Common applies.
Proposed Sale Type	Select the sale structure discussed with the client.
Prices	Enter the applicable land, house and total amounts.
Finance	Record each participating client's finance percentage.
Next Appointment	Enter the EOI follow-up date and time.
Contract Due Date	Choose a date or select To Be Confirmed.
Branch Location	Select the physical appointment branch.

The Contract Due Date may be blank while editing or saving a draft, but final generation requires exactly one date or **To Be Confirmed**.

7. Zoom Workflow

The Zoom workspace preserves the online consultation structure and keeps the eight stages visible horizontally.

The screenshot displays the ASG Sales Appointment Capture interface. At the top, the ASG logo and 'AMPLIFY SOLUTIONS GROUP' are visible, along with the title 'Sales Appointment Capture' and 'Version 2.7.0-alpha.1'. Below this, a '← Change Type' link is present. A status bar shows 'Status: Staff: Test User | Mode: zoom'. Action buttons include 'Save Draft', 'Load Draft', 'Saving...', 'Generate Appointment Package', and 'More actions'. A horizontal timeline shows eight stages: 1 CLIENT DETAILS, 2 DISCOVERY (highlighted), 3 FINANCIAL, 4 PROFESSIONAL, 5 STRATEGY, 6 WORKSPACE, 7 OUTPUTS, and 8 READY. Below the timeline, the client information 'John Smith & Jenny Smith · 22/07/2026' is shown. At the bottom, there are buttons for 'New Appointment', 'Save Draft', and 'Generate Appointment Package'. The caption 'Zoom consultation timeline' is centered below the interface.

Complete the consultation

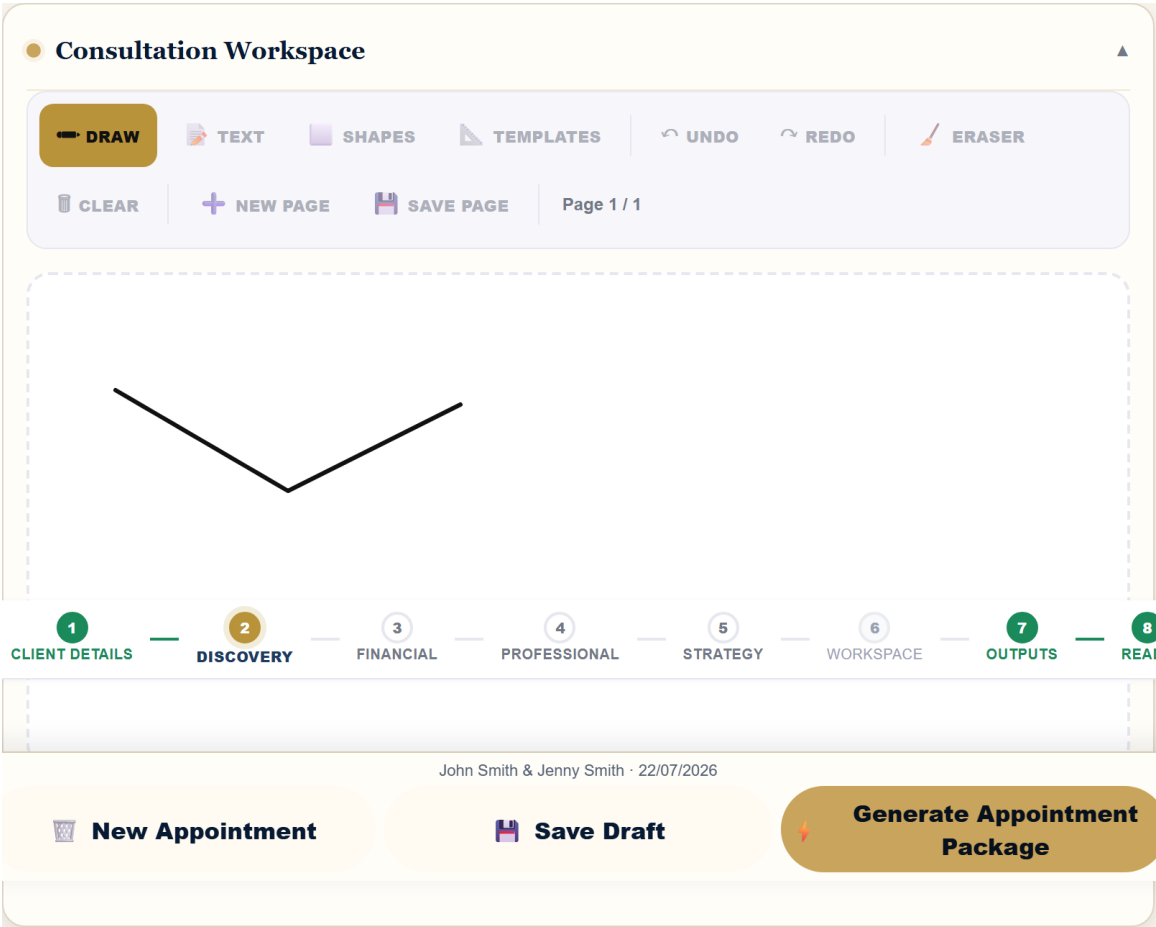

- **Discovery:** capture the client's objectives and current position.
- **Financial:** record the relevant financial discussion.
- **Professional:** capture professional contacts and referrals.
- **Strategy:** document the strategy discussion and recommendations.
- **Workspace:** use the whiteboard when a visual explanation helps.
- **Outputs:** select the forms and documents required for handover.

The Zoom Client Review date is the next-appointment source for the prepared email. A time is included only if the workflow already stores one.

Tip: Save the draft before changing appointment type or leaving the browser.

8. Zoom Whiteboard

Use the Consultation Workspace to sketch explanations during a Zoom appointment.

Zoom whiteboard with a test drawing

Whiteboard controls

Control	Purpose
Draw	Freehand drawing with pointer or touch input.
Text	Add a text annotation.
Shapes	Add supported diagram shapes.
Templates	Start from an available workspace template.
Undo / Redo	Move backward or forward through recent changes.
Eraser	Remove selected strokes.
Clear	Clear the current page after confirmation.
New Page	Add another workspace page.
Save Page	Save the current whiteboard page.

Rotate the device if more drawing space is needed. Confirm the canvas remains visible after rotation before continuing.

9. ID Documents and Signatures

Attach legible ID images and capture signatures only with the client's knowledge and consent.

The screenshot displays the 'ID Docs' step in the ASG Sales Appointment Capture app. The interface features a top navigation bar with steps 1 through 7, where step 4 (ID Docs) is currently active. Below the navigation bar is a toolbar with buttons for 'Save Draft', 'Load Draft', 'Generate Appointment Package', 'Load Test Data', and 'Settings'. The main content area is divided into two sections for 'Client 1' and 'Client 2'. Each client section contains two photo attachment areas: 'ID Front' and 'ID Back'. Each area has a 'Tap to attach photo' prompt, a 'Rotate' button, and a 'Remove' button. Below the client sections is an 'Additional Documents' section. At the bottom of the screen, there are buttons for 'New Appointment', 'Save Draft', and 'Generate Appointment Package'.

ID document attachment areas

ID photographs

1. Tap the correct **ID Front** or **ID Back** area.
2. Take a new photo or choose the correct existing image.
3. Confirm the image is upright and readable.
4. Use **Rotate** if required.
5. Use **Remove** and retake if the image is blurred, cropped or incorrect.

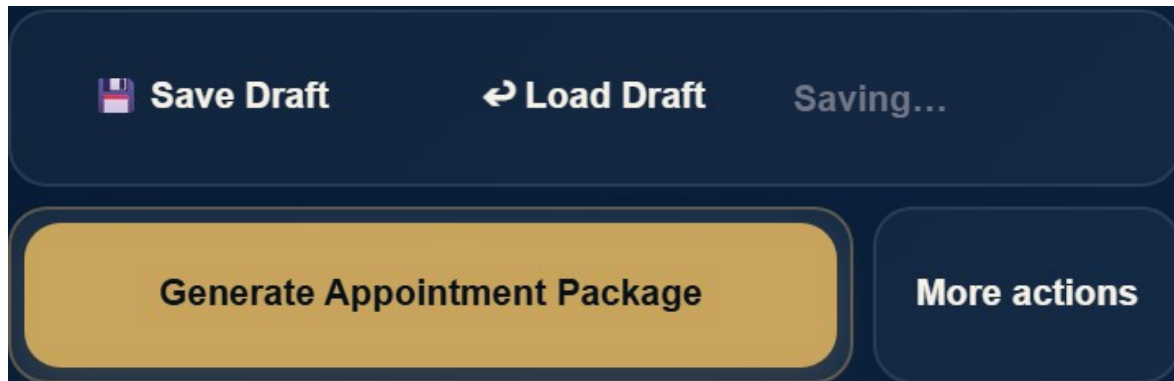

Signatures

- Confirm the correct client name above each signature area.
- Ask the client to sign within the boundary.
- Clear and repeat any incomplete signature.
- Review signatures before package generation.

Important: Uploaded ID, photos and supporting PDFs may be included in the Document ZIP. Check every file before handover.

10. Saving and Loading Drafts

Drafts are stored on the current device. Save regularly during an appointment.

Draft controls on mobile

Save a draft

1. Select **Save Draft**.
2. Wait for the saved status confirmation.
3. Continue editing. The status changes to **Unsaved changes** after the next modification.

Load a draft

1. Select **Load Draft** or resume the recent draft from the landing page.
2. Confirm the appointment details, mode and staff member.
3. Review uploaded evidence and signatures.
4. Continue from the first incomplete stage.

Warning: A draft is device-local. Clearing browser data, removing the PWA or using another device may make that draft unavailable. Download final files before closing a completed appointment.

11. Generating the Appointment Package

Select **Generate Appointment Package** only after the Appointment Summary is complete.

Final-generation checks

- Required client and property details are present.
- Selected EOI and IA fields are complete.
- Contract Due Date has a valid date or **To Be Confirmed**.
- Required ID images, supporting documents and signatures are present.
- The selected staff member and appointment date are correct.

Generation stops and shows an inline message when required information is missing. Correct the highlighted field, then generate again.

After successful generation, the package-ready panel displays the exact Combined PDF and Document ZIP filenames.

Appointment Package Ready

Your combined PDF and document ZIP are ready.

COMBINED PDF
Sales Appointment - 22-07-2026 - John Smith & Jenny Smith - Test User.pdf

DOCUMENT ZIP
22-07-2026 - John Smith & Jenny Smith - Sales Appointment Documents.zip

Download Package

Save Combined PDF

Save ZIP

Prepare Email

Appointment package ready

12. Downloading and Emailing

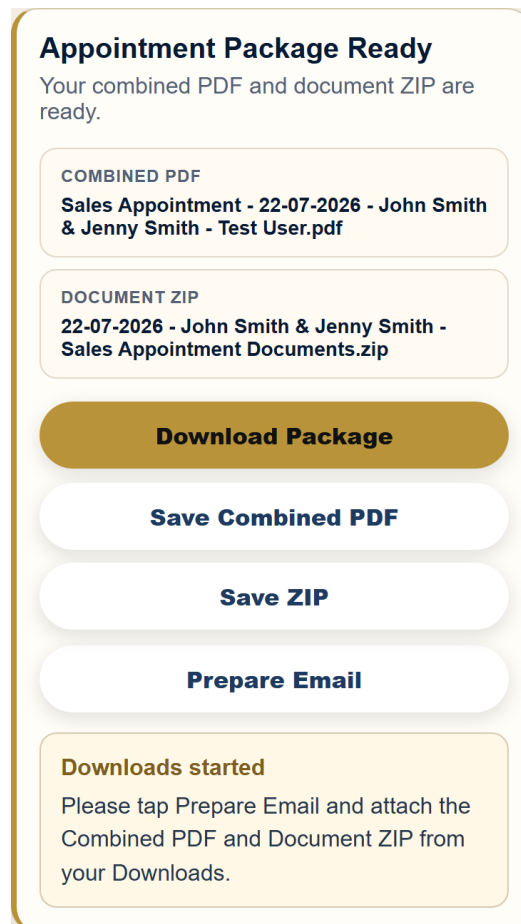

The package-ready panel provides four actions:

Action	Result
Download Package	Starts both the Combined PDF and Document ZIP downloads.
Save Combined PDF	Downloads the single client-ready PDF.
Save ZIP	Downloads individual form PDFs and supporting documents.
Prepare Email	Opens a prepared message with appointment handover details.

After **Download Package**, confirm this message:

Downloads started

Please tap Prepare Email and attach the Combined PDF and Document ZIP from your Downloads.

Downloads started confirmation

The prepared email does not attach files automatically. Add both downloaded files before sending. If the native mail action does not open, use the displayed fallback details to create the message manually.

13. Reviewing Generated Documents

Review both deliverables before handover.

Combined PDF

- Open the PDF and move through every page.
- Confirm client names, property, appointment date and staff name.
- Confirm selected EOI and IA forms are present.
- Check conveyancer details and signatures.
- Confirm attached ID/photo pages are readable and correctly oriented.

Document ZIP

The ZIP contains the individual generated document PDFs plus supporting uploaded ID/photo/additional-document PDFs. It does **not** contain a second copy of the Combined PDF.

Filenames use the appointment date and actual client names where available. If the application reports that the output was invalidated after an edit, regenerate before downloading or emailing.

Handover rule: Use only the latest generated package. Delete superseded test or duplicate downloads from the device.

14. Troubleshooting

Issue	Action
Continue is disabled	Select both your name and an appointment type.
Items remain incomplete	Expand Appointment Summary and follow the incomplete markers.
Contract Due Date error	Select a date or To Be Confirmed. Do not leave both blank.
Generated output became invalid	A relevant field changed. Select Generate Appointment Package again.
Draft cannot be found	Confirm you are using the same browser and device.
Download is not visible	Check the browser's Downloads list and device Files app.
Email does not open	Use the on-screen fallback recipient, subject and body.
Whiteboard does not respond	Ensure Draw is selected, then rotate back or refresh only after saving the draft.
PDF preview looks stale	Select Refresh Preview.

If an issue persists, record the device, operating system, browser, appointment mode and exact steps. Do not include real client data in support screenshots.

15. Best Practices and Physical-Device Tips

During every appointment

- Use one browser tab for the active appointment.
- Save after each major section.
- Check the Appointment Summary before moving to Ready.
- Keep the screen awake during uploads and package generation.
- Verify filenames before sharing.

On iPhone or iPad

- Use portrait for form entry and landscape when the whiteboard or preview needs more width.
- After the software keyboard opens, confirm the focused field remains visible.
- Allow the browser's download prompt and locate files in Downloads.
- Check bottom actions remain clear of the home indicator.
- When using the installed PWA, allow an update to finish before starting an appointment.

Accessibility

All actions can be reached by keyboard. Focus indicators show the active control. The compact **More actions** menu supports Enter, Space, Escape, Tab and Shift+Tab. Use VoiceOver or the device screen reader when required.

16. Final Checklist

Before ending the appointment, confirm:

- ☐ Correct staff member and appointment type selected.
- ☐ Client names, contacts and property address checked.
- ☐ Client 2 correctly marked present or not required.
- ☐ Required EOI and IA options selected and completed.
- ☐ Next appointment recorded when applicable.
- ☐ Contract Due Date selected, or **To Be Confirmed** chosen.
- ☐ ID images are clear, complete and correctly oriented.
- ☐ Signatures are present in the correct fields.
- ☐ Appointment Summary shows no unresolved required items.
- ☐ Draft saved.
- ☐ Appointment package generated after the final edit.
- ☐ Combined PDF reviewed page by page.
- ☐ Document ZIP contents checked.
- ☐ Both files downloaded.
- ☐ Prepared email reviewed and both files attached.
- ☐ Final handover sent to the intended recipients.
- ☐ A new appointment started only after the current handover is complete.

Complete means checked: Never rely on filenames or a success message alone. Open and verify the final files before sending.
